

## PRESS RELEASE

# Westport Signs Heavy-Duty Supply Agreement with Cummins for Westport HD 15 Litre Engine

February 20, 2012

Agreement Provides Future Scalability and Cost Effective Production Once Threshold Volumes Have Been Achieved  
VANCOUVER, BC – Westport Innovations Inc. (TSX:WPT/NASDAQ:WPRT), the global leader in natural gas engines, today announced that it has entered into a Supply Agreement with Cummins to allow manufacturing of the Westport HD 15 litre engine in a Cummins manufacturing facility in Jamestown, New York.

"The Supply Agreement helps accelerate our scalability and cost reduction at over 1,500 units per year," said Clark Quintin, President of Westport HD. "At scale, Westport HD would be able to recognize the sale of the engine in addition to on- and off-engine components increasing revenue per system."

Westport has assured available, scalable and cost effective supply for its 15L natural gas engines featuring Westport technology. The new HD Supply Agreement provides Westport with the ability to have its Westport technology-equipped heavy duty engines produced in a Cummins manufacturing facility when a minimum threshold sales volume of at least 1,500 engines in any 12-month period has been achieved by Westport. The supply agreement term is for three years beginning from the date the first Westport technology-equipped engine is shipped by Cummins after Westport meets the minimum volume threshold. The term automatically renews if the threshold volumes continue to be achieved. If Cummins does not ship a Westport technology-equipped engine within the next five years, the agreement will terminate.

## About Westport Fuel Systems

At Westport Fuel Systems, we are driving innovation to power a cleaner tomorrow. We are a leading supplier of advanced fuel delivery components and systems for clean, low-carbon fuels such as natural gas, renewable natural gas, propane, and hydrogen to the global automotive industry. Our technology delivers the performance and fuel efficiency required by transportation applications and the environmental benefits that address climate change and urban air quality challenges. Headquartered in Vancouver, Canada, with operations in Europe, Asia, North America and South America, we serve our customers in more than 70 countries with leading global transportation brands. At Westport Fuel Systems, we think ahead. For more information, visit [www.wfsinc.com](http://www.wfsinc.com).

## Cautionary Note Regarding Forward Looking Statements

*This press release contains forward-looking statements, including statements regarding the engine supply agreement with Cummins, the demand for our products, the future success of our business and technology strategies, investment, cash and capital requirements, intentions of partners and potential customers (including Cummins), the performance and competitiveness of Westport's products and expansion of product coverage, future market opportunities, speed of adoption of natural gas for transportation and terms of future agreements as well as Westport management's response to any of the aforementioned factors. In particular, the benefits arising out of the engine supply agreement depend on many factors and may be affected by, amongst other things, the effect of volume requirements under the engine supply agreement. These statements are neither promises nor guarantees, but involve known and unknown risks and uncertainties and are based on assumptions that may cause our actual results, levels of activity, performance or achievements to be materially different from any future results, levels of activities, performance or achievements expressed in or implied by these forward looking statements. These risks and uncertainties include risks and assumptions related to our revenue growth, operating results, industry and products, the general economy, conditions of and access to the capital and debt markets, governmental policies and regulation, technology innovations, fluctuations in foreign exchange rates, the availability and price of natural gas, global government stimulus packages, the acceptance of and shift to natural gas vehicles in fleet markets, the relaxation or waiver of fuel emission standards, the inability of fleets to access capital or government funding to purchase natural gas vehicles, the sufficiency of bio methane for use in our vehicles, the development of competing technologies as well as other risk factors and assumptions that may affect our actual results, performance or achievements or financial position discussed in our most recent Annual Information Form and other filings with securities regulators. Readers should not place undue reliance on any such forward-looking statements, which speak only as of the date they were made. We disclaim any obligation to publicly update or revise such statements to reflect any change in our expectations or in events, conditions or circumstances on which any such statements may be based, or that may affect the likelihood that actual results will differ from those set forth in these forward looking statements except as required by National Instrument 51-102. The contents of any website, RSS feed or twitter account referenced in this press release are not incorporated by reference herein.*
