Be a Driver for Change: Explore the Westport Connection Weekend Interactive Exhibits at Science World

October 18, 2012

VANCOUVER, BC – What's the connection between natural gas and the milk on your cereal? How might natural gas help make texting easier in India? Find out this weekend when Westport Innovations Inc. (TSX:WPT / NASDAQ:WPRT), the global leader in natural gas engines, holds its Westport Connection Weekend at Science World on October 20th and 21st. Westport invites each visitor to Science World to become a Driver for Change by learning through interactive activities about the benefits of using sustainable sources of energy, like natural gas. This weekend is part of Science World's Around the Dome in 30 Days, a month-long program, aimed at bringing the community together to explore the world of science and technology.

Westport is a contributor to Science World's Bridging the Science Gap campaign by sponsoring the Transportation exhibit in the newly-opened Ken Spencer Science Park – an interactive outdoor science park dedicated to educating youth about the future of new, clean technologies. The Westport sponsored exhibit tells the "Clean Transportation Story," with interactivity that helps demonstrate how everyday choices can impact our carbon footprint. As a leading-edge technology company, Westport became involved with Science World to foster interest in science, technology and sustainability leadership for the future generations.

Westport is dedicated to informing the public about how making the shift in transportation fuel towards more sustainable sources of energy like natural gas can provide environmental and economic benefits to our community.

"Westport is committed to investing in the future of science and technology in British Columbia," said David Demers, CEO of Westport. "With the growing demand for technology-related jobs, we have a great opportunity to develop an interest in young minds that might become the next generation of scientists and engineers. Westport is pleased to work with industry innovators such as Science World to foster our youth and inspire them towards careers in science and technology."

The Vancouver-based producer of alternative fuel, low-emissions technologies draws on B.C. universities for qualified employees. Organizations like Science World help to develop an early interest in science and technology among British Columbia students.

About Westport Fuel Systems

At Westport Fuel Systems, we are driving innovation to power a cleaner tomorrow. We are a leading supplier of advanced fuel delivery components and systems for clean, low-carbon fuels such as natural gas, renewable natural gas, propane, and hydrogen to the global automotive industry. Our technology delivers the performance and fuel efficiency required by transportation applications and the environmental benefits that address climate change and urban air quality challenges. Headquartered in Vancouver, Canada, with operations in Europe, Asia, North America and South America, we serve our customers in more than 70 countries with leading global transportation brands. At Westport Fuel Systems, we think ahead. For more information, visit www.wfsinc.com.

Cautionary Note Regarding Forward Looking Statements

Note: This document contains forward-looking statements about Westport's business, operations, technology development or the environment in which it operates, which are based on Westport's estimates, forecasts and projections. These statements are not guarantees of future performance and involve risks and uncertainties that are difficult to predict, or are beyond Westport's control. Consequently, readers should not place any undue reliance on such forward-looking statements. In addition, these forward-looking statements relate to the date on which they are made.
