

PRESS RELEASE

Volvo Car Group Unveils V60 Bi-Fuel Car with Westport Natural Gas Fuel System at NGV 2013 Gothenburg

June 11, 2013

VANCOUVER, BC – Westport Innovations Inc. (TSX:WPT / NASDAQ:WPRT), the global leader in natural gas engines, today announced that Volvo Car Group unveiled its new Volvo V60 Bi-Fuel car in conjunction with the NGV 2013 Gothenburg event being held from June 11 to 13 at the Swedish Exhibition Centre in Gothenburg, Sweden (<https://www.media.volvocars.com/se/enhanced/se-se/Media/Preview.aspx?mediaid=49384>). Sales for the new product will start in October 2013 in Sweden.

"Demand for natural gas vehicles in Sweden is expected to increase in response to the pending extension of the Government of Sweden alternative fuel tax incentive program," said Ian Scott, Executive Vice President, Westport. "The launch of this product provides a new option for corporate and municipal fleet customers."

The new Volvo V60 Bi-Fuel car, with excellent green credentials, runs on either compressed natural gas (CNG)/biomethane or petrol (gasoline), and is a sporty estate car. With a powerful 213 horsepower engine, the Bi-Fuel system offers a total driving range of 1,120 kilometers and when renewable CNG (biomethane) is used as a vehicle fuel, greenhouse gas emissions are significantly reduced compared to petrol. The new V60 will expand Volvo Car Group's Bi-Fuel product line.

Westport and Volvo Car Group are currently in discussions to expand the Volvo V60 Bi-Fuel car into other markets.

Since 2009, Westport—the sole supplier of natural gas fuel systems to Volvo Car Group—has developed and installed natural gas systems for the Volvo V70 estate car at a facility located inside Volvo's main production centre in Gothenburg, Sweden. Natural Gas Vehicles, a Global Strategic Business Report, projects that the number of natural gas vehicles (NGVs) in Sweden will triple between 2010 and 2018, from 31,179 to 92,657.

About Westport Fuel Systems

At Westport Fuel Systems, we are driving innovation to power a cleaner tomorrow. We are a leading supplier of advanced fuel delivery components and systems for clean, low-carbon fuels such as natural gas, renewable natural gas, propane, and hydrogen to the global automotive industry. Our technology delivers the performance and fuel efficiency required by transportation applications and the environmental benefits that address climate change and urban air quality challenges. Headquartered in Vancouver, Canada, with operations in Europe, Asia, North America and South America, we serve our customers in more than 70 countries with leading global transportation brands. At Westport Fuel Systems, we think ahead. For more information, visit www.wfsinc.com.

Cautionary Note Regarding Forward Looking Statements

Note: This document contains forward-looking statements about Westport's business, operations, technology development or the environment in which it operates, which are based on Westport's estimates, forecasts and projections. These statements include specifically, statements regarding the timing for initial sales of the new V60 Bi-Fuel car and estimated future number of NGVs in Sweden. These statements are not guarantees of future performance, are based on a number of assumptions and involve known and unknown risks and uncertainties that are difficult to predict, or are beyond Westport's control including the development of competing products and technologies, availability and supply of natural gas, price and supply of gasoline, timing of execution of agreements with distributors and other counterparties, and other risk factors and assumptions that may affect our actual results, performance or achievements. Consequently, readers should not place any undue reliance on such forward-looking statements. In addition, these forward-looking statements relate to the date on which they are made. Westport disclaims any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise except as required by National Instrument 51-102. The contents of any website, RSS feed or Twitter account referenced in this press release are not incorporated by reference herein.
