

PRESS RELEASE

Westport Announces Yang Guang as President, Asia Pacific

June 3, 2014

VANCOUVER, BC – Westport Innovations Inc. (TSX:WPT / NASDAQ:WPRT), engineering the world's most advanced natural gas engines and systems, today announced the appointment of Yang Guang to the position of President, Asia Pacific.

"Yang Guang brings extensive strategic planning, legal and operational expertise from key transportation industries in a growing market for Westport technology, particularly rail and automotive," said Nancy Gougarty, Westport President and COO.

In this role Yang Guang will oversee Westport's Asia Pacific business operations, sales, marketing, engineering, production, and service activities which include China (including Hong Kong and Taiwan), India, Korea, Japan, Australia and Association of Southeast Asian Nations (ASEAN). A key member of Westport's leadership team, he will be developing and growing Westport business in Asia Pacific.

Most recently Yang Guang's experience includes Director of the Board and General Counsel at TRW Asia Pacific, where he worked as part of the executive team on the planning and execution of critical business objectives including footprint expansion, market entry/exit, business collaboration and customer strategy. He has also worked with key leaders in managing and enhancing relationships with government, customers and joint venture partners and led TRW's internal legal team and external counsel in China, Japan, Korea, Malaysia, Thailand and Singapore ensuring regional legal compliance, maximizing opportunities and mitigating risk.

Yang Guang's prior experience includes Vice President and Head of Legal, APAC at Siemens Healthcare Diagnostics, Group Lead Counsel for Siemens Mobility Division and Siemens Financial Service at Siemens Ltd. China. Yang Guang has also held various roles in investment banking, international law and government.

The market for natural gas in transportation in China is burgeoning. According to the International Energy Agency, natural gas demand in China's commercial road transport sector will reach around three times higher than today's levels by 2035.

In 2013, according to Power Systems Research, China produced 1,352,171 medium and heavy duty trucks and buses, of which 720,955 were Class 8 equivalents. The potential for liquefied natural gas (LNG) as a transportation fuel in China continues to increase with the growing amount of LNG imports and terminals.

About Westport Fuel Systems

At Westport Fuel Systems, we are driving innovation to power a cleaner tomorrow. We are a leading supplier of advanced fuel delivery components and systems for clean, low-carbon fuels such as natural gas, renewable natural gas, propane, and hydrogen to the global automotive industry. Our technology delivers the performance and fuel efficiency required by transportation applications and the environmental benefits that address climate change and urban air quality challenges. Headquartered in Vancouver, Canada, with operations in Europe, Asia, North America and South America, we serve our customers in more than 70 countries with leading global transportation brands. At Westport Fuel Systems, we think ahead. For more information, visit www.wfsinc.com.
