

## PRESS RELEASE

### IMPCO Technologies Expands Hydrogen Components Availability

November 15, 2016

**Kitchener, ON** - IMPCO Technologies, Inc., a global leader in the alternative fuel industry and a division of Westport Fuel Systems Inc., has released additional hydrogen components to the line of 350 bar (5000 psi) solenoid valves, safety devices, isolation valves and regulators.

The expanded hydrogen product line offers customers cost effective components and features that will meet their current and future requirements for high pressure to low pressure fuel controls and safety devices from the cylinder to the fuel cell.

GFI branded high pressure hydrogen components have been a proven original equipment manufacturer standard for over 15 years in the 350 bar fuel cell market, globally. IMPCO has supplied numerous customers in North America, Europe, and Asia with products specifically designed to meet their hydrogen component requirements in automotive, material handling, transit bus, and stationary power applications.

IMPCO's hydrogen product line now includes:

- H-TV-200 series internal solenoid tank valve, integral safety device, manual shut down and temperature sensor
- H-TV-600 series heavy duty internal solenoid tank valve, integral safety device and electrical connector
- H-ITVR fuel delivery module, tank valve and 2 stage regulator in one unit
- H-PRD-4 series end plug and end of line safety devices optimized for maximum heat transfer and fast activation
- 350 bar solenoid isolation valve

### About Westport Fuel Systems

At Westport Fuel Systems, we are driving innovation to power a cleaner tomorrow. We are a leading supplier of advanced fuel delivery components and systems for clean, low-carbon fuels such as natural gas, renewable natural gas, propane, and hydrogen to the global automotive industry. Our technology delivers the performance and fuel efficiency required by transportation applications and the environmental benefits that address climate change and urban air quality challenges. Headquartered in Vancouver, Canada, with operations in Europe, Asia, North America and South America, we serve our customers in more than 70 countries with leading global transportation brands. At Westport Fuel Systems, we think ahead. For more information, visit [www.wfsinc.com](http://www.wfsinc.com).

### About IMPCO Technologies

IMPCO Technologies Inc., a division of [Westport Fuel Systems Inc.](http://www.wfsinc.com), develops, manufactures and markets products that enable internal combustion engines to operate on less expensive, cleaner burning fuel which promotes both energy independence and a cleaner environment. IMPCO Technologies provides turn-key solutions for mobile equipment and stationary engines, including industrial forklifts, sweepers, auxiliary power units/generators and construction equipment. IMPCO is also a world leader in Truck and Rail Idle reduction, a technology that allows Class 8 trucks and diesel locomotives to achieve significant fuel savings while improving comfort for the truck operators and providing heating and electrical services that keep the primary engine ready for use.

Based in the Canada and the USA, IMPCO is a well-established global proprietary brand owned by Westport Fuel Systems Inc. and is one of the most recognized names in the combustion engine alternative fuel systems and component markets. Additionally, ComfortPro is a well-recognized North American Diesel Auxiliary Power Unit ("APUs") brand, known within the trucking industry for its superior performance and quality.

IMPCO offers a comprehensive range of alternative fuel components, and complete alternative fuel systems for both certified and non-certified engines. In addition, IMPCO's APUs and best in class services provides original equipment manufacturers, country distributors and aftermarket installers a rich portfolio of solutions from concept to vehicle integration and assembly.
