

PRESS RELEASE

Westport Expands MY2017 Ford Product Line

November 28, 2016

Environmental Protection Agency Certifies Westport's Emission-Reducing WiNG™ Power System on Multiple Ford Platforms
VANCOUVER, BC – Westport, engineering the world's most advanced natural gas engines and vehicles, today announced it has received certification from the Environmental Protection Agency ("EPA") for its Westport WiNG™ Power System on multiple 2017 Model Year ("MY") Ford products.

As a leading developer and installer in Ford's Qualified Vehicle Modifier ("QVM") program, Westport has the largest line-up of Ford alternative fueled vehicles; offering fleets a diverse choice of fuel from a single provider.

Westport has also streamlined the supply chain through a Ford-approved Ship-Thru process on the F-150, F-250/350 and Transit products, reducing transportation costs and simplifying the ordering process. Once the Westport WiNG™ Power System is installed, calibrated, and validated, the alternative fuel vehicles are returned to the Ford transportation system and delivered to the customer.

"As one of the most experienced and trusted names in alternative fuel systems, our EPA certified expanded product line meets all Ford OEM safety requirements, quality engineering and design," said Paul Shaffer, Vice President & Managing Director of Westport OEM North America. "Ford backed warranty, financing and ship- thru ordering, combined with a nationwide network of trained technicians, provides fleets with a seamless ordering experience and more fuel choices from a single full service provider."

EPA certifications have been received for compressed natural gas ("CNG") and liquid propane gas ("LPG") models:

- F-150 5.0L CNG and LPG
- Transit 3.7L CNG
- F-450/550/650/750/53/59 6.8L CNG
- E-450 6.8L CNG

About Westport Fuel Systems

At Westport Fuel Systems, we are driving innovation to power a cleaner tomorrow. We are a leading supplier of advanced fuel delivery components and systems for clean, low-carbon fuels such as natural gas, renewable natural gas, propane, and hydrogen to the global automotive industry. Our technology delivers the performance and fuel efficiency required by transportation applications and the environmental benefits that address climate change and urban air quality challenges. Headquartered in Vancouver, Canada, with operations in Europe, Asia, North America and South America, we serve our customers in more than 70 countries with leading global transportation brands. At Westport Fuel Systems, we think ahead. For more information, visit www.wfsinc.com.

About Westport

Westport, a division of Westport Fuel Systems Inc., engineers the world's most advanced natural gas engines and vehicles. We work with original equipment manufacturers worldwide from design through to production, creating products to meet the growing demand for vehicle technology that will reduce both emissions and fuel costs.
